

Qwen3.8 Flash: fixed-corpus fidelity

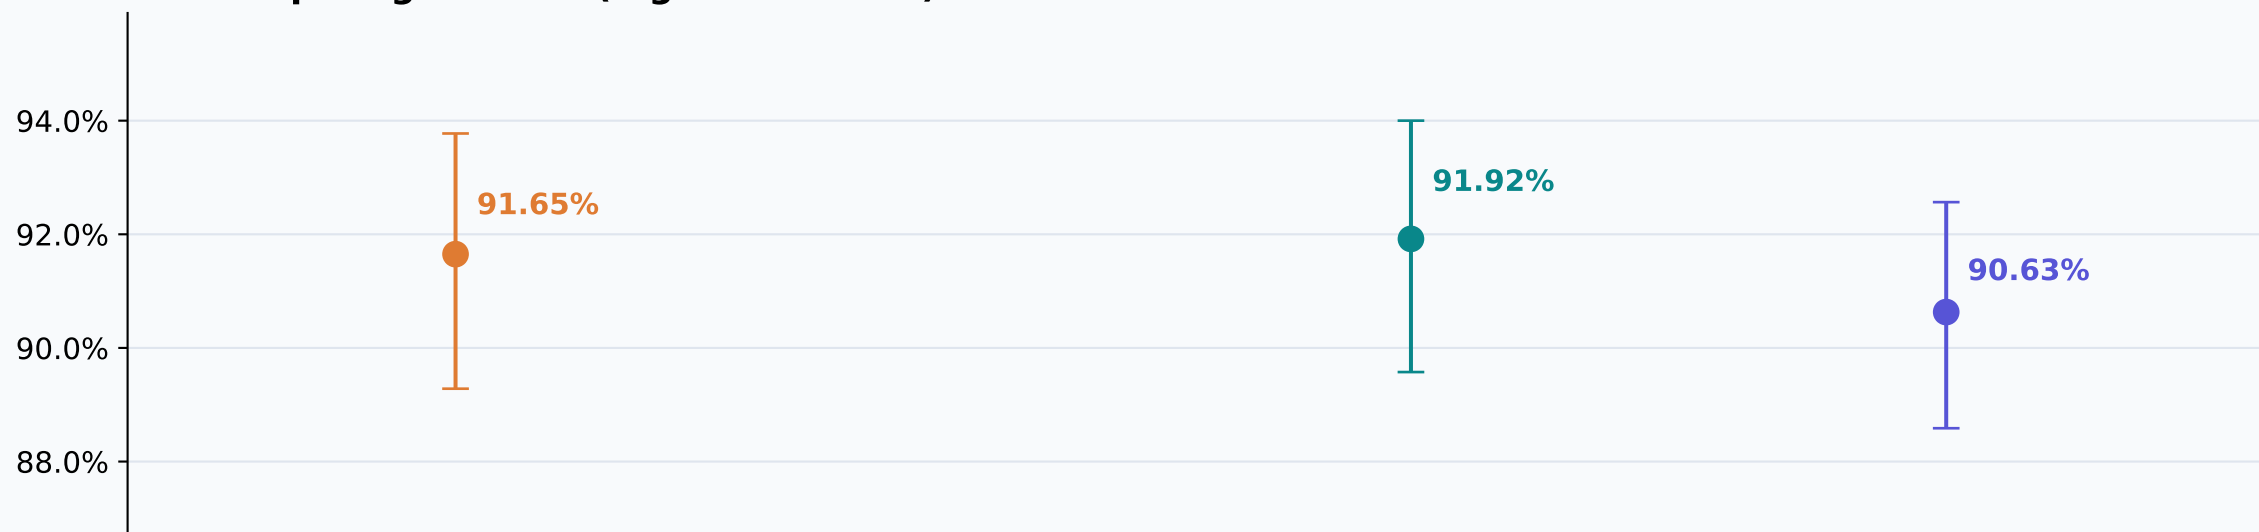

Original BF16 reference | 16,384 scored positions | Same frozen engineering text

IU4

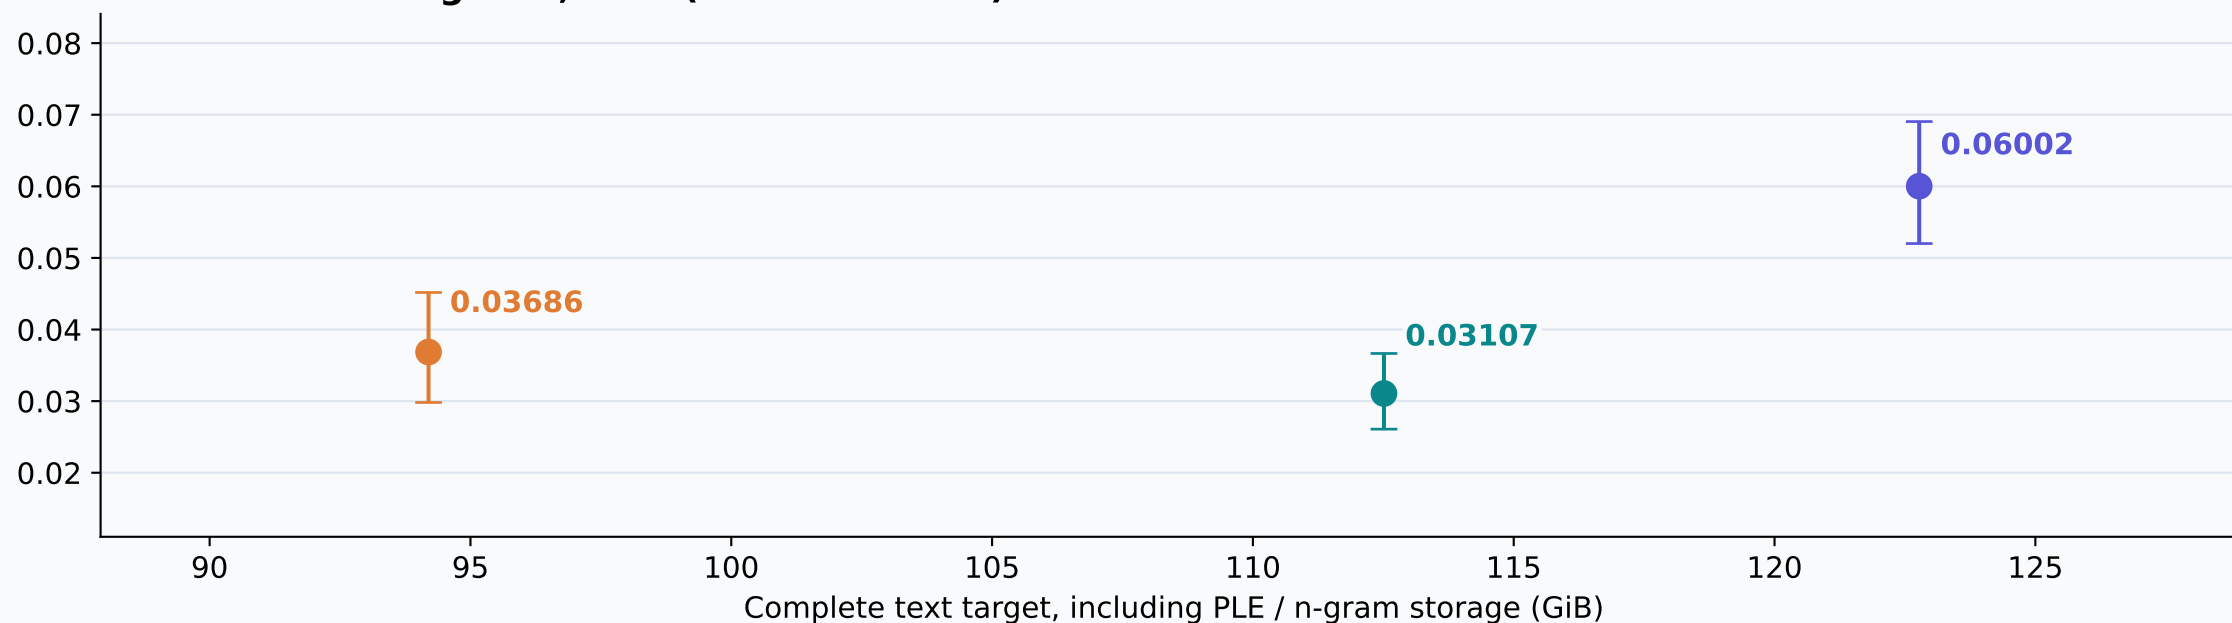

AP-Q4_K_XL

AP-Q5_K_XL

Strict top-1 agreement (higher is better)

Forward KL divergence, nats (lower is better)

Whiskers: 95% bootstrap intervals over eight repository clusters. Not task accuracy.

Full model + runtime configurations; custom kernels can affect fidelity. No MTP or sampling.

Different corpus/reference from the publisher chart: those percentages cannot be placed on this scale.
